1st June, 2015
For sending full articles :
15th June, 2015

TARGET AUDIENCE

Six Sigma practioners from industry, academics and consultancy services. Students from the academic institutions are also encouraged to participate.

SIX SIGMA SYMPOSIUM

2-3 JULY 2015

Six Sigma is a structured, data based approach for process / product improvement through variation reduction, which has origins at Motorola Inc. Mikel Harry and Bill Smith formulated this approach by integrating the preachings of eminent quality gurus in a capsule form which can be applied everywhere. Jack Welch of GE further popularized it.

Indian Statistical Institute, (ISI), Chennai is conducting Six Sigma programs since 2004. So far, it has conducted about 50 batches of Green Belt, Black Belt and Master Black Belt programs, which has produced more than 1000 certified Belts. Curriculum for these programs have been designed in consultation with the industry. These programs have earned a name for themselves in the industry. With this backdrop, ISI Chennai is proposing to conduct a symposium on Six Sigma to:

- ◆ Investigate current trends in Six Sigma.
- ◆ Identify lacunae, strengths and opportunities in various aspects of implementation and sustenance of Six Sigma efforts.
- ◆ Share experiences gained in implementation of different Six Sigma approaches.
- ◆ Frame strategies for more efficient deployment.

We expect that this symposium to provide an interactive forum where Six Sigma professionals can meet, discuss and debate strategies and approaches to be used to raise the level of performance of their organizations besides mutual learning. This symposium will also provide an unparalleled networking opportunity for these professionals from this region, they can also interconnect and share their knowledge and experience. Whether you are from IT / ITES, manufacturing, processes, services and consultancy service this symposium is for you. Symposium would contain talks by speakers from the Industry and academia and few speakers from Europe and USA are expected to participate.

The Organising Committee is pleased to invite abstracts of papers and case studies on Six Sigma for presentation during the symposium.

PARTICIPATION FEE

For ISI certified (all centres)
GB/BB/MBB's:
Rs. 1500
(Certification number to be provided).
